

Job role: Senior Project Manager

Previous experience: 10+ years

Location: Remote / Tilburg, NL

Description:

- Working closely with the Workstream Leader (Accountable) and the Transformation Management Office (TMO)
- Supporting the day-to-day execution of the workstream implementation roadmap (Comprising of multiple projects & tasks, across an initial 3 – 6 Month period), under the umbrella of the overall Transformation program
- Scheduling, coordinating, and managing project meetings, ensuring actions are documented, followed up and closed, utilizing myIMO (Transformation/Integration Platform)
- Overseeing, tracking, and monitoring the detailed integration project plans, tasks, dependencies and interdependencies against project milestones and metrics, continuously managing the relative prioritization as required.
- Managing the reporting of issues, risks, and dependencies, driving proactive resolution; proactively identify potential program gaps and corrective actions, escalating if necessary
- Working across projects and workstreams where applicable to ensure alignment on interdependencies, and/or as a key stakeholder in the integration of systems, liaising, aligning or resolving as required.
- Continuously aligning the workstream integration roadmap/projects with the core cross-functional change, communication, and synergy roadmaps/plans.
- Ensuring that project updates are made and supporting workstream reviews for the respective governance meetings, weekly and biweekly, at the operational and strategic levels.
- Reporting to the Director Strategic Direction, Governance & Master Planning within the TMO and will work alongside the Workstream Leader.
- Dealing with numerous international stakeholders
