

Job role: Project Lead Continuous Improvement

Previous experience: 3+ years

Location: Geleen

Description: As a Project Lead Continuous Improvement, you will be able to relate well to the client's problem definition and working methods. You must therefore have the right interpersonal and coaching skills. In addition, you have strong analytical skills and numerical insight, which allow you to quickly structure the problem definition, perform analyses and select the right causes and solution directions. You will become one of the faces of Perfect in the field of Lean Six Sigma and also propagate this to (potential) clients. Where you act within all layers of the operation (from operations to management).
