

Job role: Sr. Project Manager Product Development

Previous experience: 5+ years

Location: Eastern part of the Netherlands, Enschede area

Description:

Your role is to lead with a multidisciplinary team complex customer product developments in a high-tech, scale-up company. These stage-gated projects take up to several years and need excellent internal and external stakeholder management in a technical environment. You run multiple projects in parallel and manage project plans, scope, schedules, budgets, risks, opportunities, progress reports, volume scale-up plans, and documentation.
